ARBOR DAY PROGRAM TO TAKE PLACE THIS AFT.

Plans for the Arbor Day tree planting are now complete. Washington Grammar school, Women's Civic Improvement Club and Laurel Parlor are joining in the rite to celebrate the birthday of Luther Burbank in a fitting manner.

The exercises will commence at the Washington Grammar school at 1:30 P. M. where Walter Carlson will deliver an address on Luther Burbank. The children will sing "Tree Planting." Richard Marriot will tell of the origin of Arbor Day. After the singing of the Battle Hymn of the Republic the children will for in line and march to the city square.

Here the Women's Civic Improvement Club will take charge and plant a flowering plum. Mrs. C. E. Parsons will tell of the Bi-Centennial of Washington. The school children will again sing.

They will then proceed to the Native Daughters Square where the Native Daughters will plant two flowering double rose hawthornes, one on each side of the entrance. Rev. Buckner will deliver a short address and Mrs. Talbot will sing "Trees." The school children will sing "Battle Hymn of the Republic" and the audience are asked to join in. The exercises will be concluded by Rev. Father O'Reilly who will pronounce the benediction.

BANNER MOUNTAIN MINE STARTING OPERATIONS

The old Central property or Banner and Central Consolidated mines situated in the Banner Mountain region are starting operations with several men retimgering the main tunnel.

Mr. A. R .Archibald is owner of this property which consists of about 1000 acres of virgin ground.

"The extension of the Central tunnel in a few hundred feet should tap an immensely rich ore body under Banner Mountain, which is virgin ground."

This is one of the large mine properties that the late A. A. Willoughby predicted such a wonderful future held in store.

TO MARK OPENING OF TAHOE-UKIAH HIGHWAY

R. J. Bennets is planning to go to Colusa today (Friday) to attend a meeting called by the Colusa Chamber of Commerce to plan on a celebration to mark the opening of the Tahoe Ukiah road. R. W. Robinson of Grass Valley will represent the Grass Valley Chamber of Commerce.

Mr. Boucher, Manager of the Sacramento branch of the State Chamber is heading the movement.

tI is expected at the eastern terminal and continuing on to Ukiah with ovations of some sort at the various towns along the route. However the plans are still very immature and the matter will be thoroughly discussed at the meeting today.

TWO SCOUT MEMBERS RECEIVE MERIT BADGES

The Boy Scouts of Nevada City held an honor court Wednesday night at scout headquarters in the Masonic building and merit badges were awarded to the following scouts: Bill Sharp, woodwork and woodcraft; Billy Plummer, firemanship. Tests were passed by several of the other boys.

Scoutmaster L. W. Northern and Dr. Chapman were in charge of the meeting and there was a good attendance of the scouts present.

GOLD BLOSSOM OPERATING

The Gold Blossom mine in the Ophir district is preparing to pump out the shafe and retimber same. New equipment is being installed which will make the property up-to-date. There is also a mill on the ground.

BIRTHS EXCEED DEATHS

Four children were born within the corporate limits of Nevada City during the past month and three deaths occurred.

HAS FINE COLLECTION OF RARE OLD COINS

Henry Meyers of Downieville is possessor of a fine collection if rar old coins. There are over 200 coins in the collection including coins from almost every nation in the world even Egyptain and Arabic coins. Many rare old United States coins are also to be seen in the group.

Among the United States coins is a 25 cent piece of 1805. This is the oldest U. S. coin in the collection. It is much larger than the present day quarter and thinner. The marks are very plainly visible which is remarkable for its age. There is another piece of the same denomination of 1818. It is the same size as the older one. Among the 50 cent pieces are the dates 1829 and 1838.

Another oddity among the coins was a 20 cent piece of 1875. It was slightly smaller than the present day quarter. Several 3 cent pieces made of silver and smaller but thinner than the dime of today drew our attention.

There are also in the collection several coins from the Philippines and Hawaiin Islands.

Besides the coins Mr. Meyers has a large number of paper currency. The larger portoin of the currency money. One piece of paper that attracted our attention was a 10 cent piece on the City of Albany dated 1862.

Mr. Meyers has had many offers for his collection but refuses to part with it.

YOU BET MINING CO. TO TRY NEW SYSTEM

Mr. Thompson, a man familiar with team shovel work, has gone into the You Bet mining District and has set up a power shovel to mine in a similar manner to dredging.

This operation is being watched with great interest and will aid mining operators who have found other methods too expensive or not practical.

By this method boulders and all large debris is screened off allowing only sand and fine material to sift through to the sluice boxes.

The You Bet mining district is very rich, several millions of dollars having been taken out in the past.

MINERS REAL ESTATE CO. SEEKS LISTINGS

Organized for the purpose of establishing a clearing house for the sale, leasing and financing of mining claims, The Miners Real Estate Company has recently open offices in Grass Valley. The main office ic located at 208 Wes Main Street, with branch office at 137½ Mill Street.

Owners of mining properties can call at either office and list their holdings. These listings are open to the bying public, and are also sent to San Francisco, Los Angles and New York.

The company is linced by the real estate department of California, and is also under bond.

The promoters of the company announce that they will also prepaire mining leases, draw contracts, and attend to the technical details of forming corporations including the securing of permits to sell stock.

MAYFLOWER LETS CONTRACT

The Mayflower has let a contract for a 1400 foot tunnel at the Baltimore mine at Forest Hill. The contract has been let to Nevada County men.

INSPECTS SOUTHERN CROSS

Gibbens and Place of Los Angeles are inspecting the Southern Cross gold mine. This property is situated in tht Humbug Mining District, down from the town of Toule ,on the North Fork of the American River.

OMEGA LIMITED

The Omega, Ltd., has been working all winter. They are using a power shovel. This property is situated near the head of the Yuba River and they are operating in very rich gravel The water used in placering at the Omega, just above, is used in sluicing the gravel of the Omega, Ltd.

A crew of six men are employed at the present time at the mine.

CALIFORNIA MINING ASSOCIATION TO HOLD BIG MEETING SATURDAY

Plans are completed for the meeting of Nevada Sierra Placer and Yuba Counties Chapter of the Mining Association of California to be held in the Elks Hall at 3 o'clock in the afternoon.

James Stewart of Auburn, chairman for this chapter will preside. After a short business session a series of short talks will be given.

Walter Bradley, the state mineroligist will tell of the program outlined for the Department of Mines of the Division of Natural Resources. Mr. Bradley has many friends in the district having visited here a number of times and they will be glad to welcome him again.

The Insurance "Bug Bear" will be explained by Frank J. Creede, Manager of the State Compensation Insurance Fund. Senator Cassidy, who was a member of the Senate Investigating Committee, will tell of the results of the investigation.

Our "Jerry" will tell what he is doing for the Mining Industry this session.

Two old stand-bys in the Association will be here, C. S. Brooks Secretary of the Mining Association of California, who has for his subject, "The Needs of the Mining Association," and Charles L. Gilmore, who has chosen the timely subject, "Natural Resources and the Depression."

Through Senator Cassidy and Assemblyman Seawell the members of the Legislature have been invited to attend the meeting.

While the mining meeting is going on the ladies who do not care to attend will be entertained by a group of local ladies at cards in the Elks Club rooms. Gold nuggets are to be awarded as prizes.

Saturday evening there will be a dinner dance at the National Hotel. Special music is being provided for the occassion and it is hoped that a large number of town people will attend and greet the strangers.

Sunday the visitors will be shown through the local mines or they may enjoy one of the many drives around Nevada City.

Wm. Sharp has donated a fine nugget to be awarded as the first prize. This specimen was found in the American River near Colfax and has been on display in The Nugget office window for some time. This is indeed a generous offer of Mr. Sharp and the ladies will be indeed grateful especially the lucky winner. Other smaller nuggets will be awarded.

Mrs. Ed Uren and Mrs. Gordon Bettles, as a local committee, will be assisted by Mrs. James Stewart, Mrs. B. A. Cassidy and Mrs. J. L. Seawell in acting as hostess to the visiting ladies

Word has been received from "Jerry" Seawell that the members of the Assembly will be here 45 strong and there will be a similar number from the Senate.

MR. AND MRS. DE WHITE PRAISE NEVADA COUNTY

Mr. and Mrs. Chas. DeWhite of Seattle, Washington, visited The Nugget office on their arrival from that city. Both are enthusiastic in their praise of Nevada County as a coming gold producer of even larger sums than have been mined in the past.

They state that the only trouble is that the outside world doesn't know that such an immense mining opportunity exists. Mining men that know Nevada County and the Mother Lode have their eyes on gold mining in California.

Mr. DeWhite stated that all metal mines outside of gold are closed.

Mr. DeWhite is secretary and treasurer of the Sunshine Mining Company of Grass Valley. This mine adjoins the North Star property, one of the most noted gold producers in the United States.

Mrs. DeWhite is vice president of the Thora mine while Captain T. Laughlin is the president.

YUBA PASS ROAD EAST OF DOWNIEVILLE CLOSED

Last Monday the Yuba Pass Highway was closed east of Downieville and will remain closed every week until Saturday morning at 7 a. m.. The road will be opened to traffic Saturdays and Sundays. It is expected htis condition will continue until about June 30, unless work on the new road reaches New York ravine before that time, in which case the closing order will terminate.

JURY TRIAL DEMANDED IN ORDINANCE CASES

The four test cases filed in the court of Judeg Mulroy at Grass Valley for the purpose of determining the constitutionality of the peddlers' license of five dollars per month came up in court for decision on Thursday afternoon.

Judge Mulroy overruled the demurrers filed several months ago by Attorney Oscar E. Winburn.

Mr. Winburn then asked that pleas of not guilty be entered in each of the four cases, and demanded that each of the cases be tried by jury.

Mr. Lynn Kelly, who had represented the city in the matters, announced to the court that District Attorney W. E. Wright would be substituted as counsel for the city.

It is txpected that the cases will come up for trial within the next thirty days. These cases involve the validity of an old city ordinance passed in 1893, and it is the contention of Mr. Winburn that ex-service me, are exempted by State law from paying the city licese.

VETERAN MINER DIES IN DOWNIEVILLE HOSPITAL

Arthus E. Haskell, who has been a resident of the Downieville section for more than 30 years passed away at the county hospital in that place on Monday afternoon.

He had many friends among the people there where he was generally respected by those who knew him. He was 65 years of age.

The Sapper

ASSESSING PROPERTY STARTED MONDAY

County Assessor H. C. Schroeder with his force of deputies began the field work of assessing the property of taxpayers in the county owned by them on Monday last. Grass Valley and Grass Valley Township will be first covered and the assessor has opened offices in Sierra Hall on Church street for the convenience of taxpayers.

All persons owning personal property and who are not assessed for real estate must pay the amount of their tax at this time. Most of those taxpayers are those owning automobiles, and other personal property.

War veterans who are exempt from tax on property to the value of $1000 should appear at the assessor's office and file their affidavits. These affidavits must be filed every year in order to secure the benefit of the exemption.

TOM AND JERRY MINE WAITING FOR WATER

The Tom and Jerry mine which was purchased by the Bickel interests of New York from Mr. and Mrs. Wm. Fenton. is waiting for a sufficient flow of water to start hydraulicking.

The property is fully equipped to start operations. They have built new cabins, put in nearly all new pipe line, and have installed a new gas range in the cookhouse. The management finds it cheaper to buy tank gas than to cut wood.

The company expects to build a reservoir on the property this summer to catch water for sluicing.

The Bickel interests are well pleased with the property and according to Mr. Jim Stewart, their engineer, it will be brought onto a paying basis before long. A watchman is looking after the property at the present time.

FIRE PREVENTION RESOLUTION PASSED

A joint resolution was unanimously passed by both the senate and the assembly, Monday, March 2, which memorializes Congress to act immediately on the Englebright fire prevention bill now before Congress.

The purpose of the resolution is to obtain action by Congress at the present session upon this bill. It was telegraphed to Washington Monday night.

The resolution follows:

SENATE JOINT RESOLUTION NO. 10.

Relative to Englebright Fire Prevention Bill H. R. 3245.

Whereas, There is pending in Congress the Englebright Fire Prevention Bill H R. 3245, calling for an appropriation of $4,000,000 for improvement and protection of the national forests; and

Whereas, From the above appropriation $200,000 is specifically appropriated for range improvements and rodent control in national forests; and

Whereas, The fire menace is becoman every increasing hazard because of the influx of tourists into mountanious sections of California; now; therefore, be it

Resolved by the Senate Assaembly of the State of California, Jointly, That we most heartily urge our representive in Congress to support its passage; and that the President of the United Sates be requested to attaach his cignature thereto so that it may become a federal law; and, be it further

Resolved, That the Secretary of the Senate is hereby directed to transmit copies of this resolution by telegraph to the President and Vice President of the United States of the United States, the Speaker of the House of Representatives, and to senators and representatives of California in the Congress of the United States.

APPOINTED P. M. OF SENATE

Mrs. W. I. Redding of Downieville was appointed as postmaster of the State Senate. Mrs. Redding has previously served as assistant postmaster in the Senae and her efficient work and knowledge of the office won for her the higher place.

DOINGS OF INTEREST AROUND STATE CAPITOL.

Monday Morning the corridors at the Capitol were a regular bee-hive, filled with buzzing lobbyists. Each member of the legislature will be an extremely important personage from now untill the adjourment. How useful and important we all become when some one wants to use us for furthering his own ends, and how extremely unimportant we are when our views run contrary to theirs. It is true in all phases of life, but particulary so in the Legislature, where changes and bullet like rapidly.

A very decided movement is being evidenced in group meetings of State Senators, to frown upon salary increases of government officials. reveived substantial increase during the war and this group which seems at present to be in the majority, feel that the present period of depression is a poor time to make government more expensive by running up the salary list. A more rigideconomy is essental in all branches and phases of government now than ever before.

Ralph Clock, newly elected Senator from Long Beech, who will take the seat made vacant by the elevation of Frank F. Morriam to the office of Lieutenant Governor, put in an appeorance in the Senate Chambers Monday morning. Senator Clock will be officially sworn in and assume his duties upon receipt of official notification by county officials that he has been elected.

A group of San Francisco advisers of Governor James Rolph, Jr., together with Senator Ralph Swing if San Bernardino County, Roy Fellon of San Francisco and Assemblyman "Pat" Pattersonof Taft, Kern County,will get toghter next Monday night in an endeavor to work upon. At present both houses of the Leglature are more or less like a ship without a rudder, but it is hoped that choes will be welded into a progress of achievement that all the Legislature can get behind. There has been evidenced in the past against lature feel that in this time of strees, governors. Members of the Legis- all should unite on a program of honest development in an earnest effort to improve conditions rather than advance their own personal interests and ambitions. If the Governor can work out an honest program, He will have no opposition.

FORMER RESIDENT DIES IN SACRAMENTO

James O. Carlisle died early Sunday morning at the Sacramento Hospital after an illness of several months.

He was a native of Ohio and aged 77 years. About the year 1915 he lived with his family on what is known as the Nilon homestead, now occupied by E. R. Stambaugh and family.

During his residence in this city he made many friends who will regret to learn of his death.

SEATTLE MAN BONDS PROPERTY

A Seattle Company, headed by Mr. Arbander has taken a bond on the Otto Walter property near the Eclipse mine and are preparing to clean out the shaft and do considerable development work.

DAUGHTER ARRIVES

Mr. and Mrs. Howard L. Harris of 158 Fifth street, Richmond, are receiving congratulations upon the birth of a baby daughter, Betty Jean, born to Mrs. Harris in the Hayward hospital February 27. Mrs. Harris was formerly Miss Olda Hitchins of Nevada City.

WORKS MINE AT GEORGETOWN

Walter M. Sims, a Nevada City man, is opening the Alpine mine at Georgetown. Seven or eight men are employed.

Ignition parts and accessories at the Miners' Foundry. tf

MINIG INDUTRY IS BACKBONE OF COUNTRY

We are all prone to compare our present with the very best in our past; prone to think every set-back a major one. Recently a man who had been in the habit of earning and spending a hundred thousand every year found himself forced to accept and live upon one-quarter of that amount. He saw nothing short of penury in $25.000 and to avoid it tookhis life. To many, $25,000 is a gigantic sum. It certaily can bring moderate comfort and luxury. It's all in the state of mind, editorially coments the Mining Congress Journal for February, which continues: "In 1928, the mining industry was healthy, happy and resonably prosperous. In 1929, that industry suddenly acquired wealth. Dividends mounted, production climbed. We were on the crest of the wave. But 1930 was just around the corner, standing with a sharp pin all ready for our beautful balloon; and now 1930 has passed by us, and as we inventory the result we pull a long face and join the great procession of industry howlers and moodily tell the world that 1930 did" wrong by our Nell."

That is true, in a degree. But, if 1929, with its false promise had not heaped our hands full of goods things, 1930 would not have had so black an eye, for its record compares most favorably with 1928 when none of us felt we couldnot go forward because our shoes were a bit worn at the heel.

All of us would like to see mining on the boom. When there is an active demand for minerals, there is great prosperity aboard. But decause we are reduced does not give us license to cry like spoiled children.

Let's tighten up our belts and go ahead, for the mineral industry of this country is its backbone, producing 54 per cent of all the freight carried by the railroads; paying 22 per cent of the federal tax income; spending three hundred and fifty millons for epuipment and supplies; employing thousands of workers. - With more than 12 billions invested mining is one of the most substantial of the country's assets.

WORD PRODUCTION OF NATURAL GASOLINE

The world production of natural gasoline increased from 41,470,069 barels in 1927 to 58,200,357 barrels in 1929 a gain of 16,730,288 barrels, or 40 per cent, according to the United States Bureau of Mines, Department of Commerce following the completion of a survey conducted by E. B. Swanson, Chief Petroleum Economist, through which the first complete quantitative data on natural gasoline production and utlization in foreign countries have been assembled. This survey was inaugurated during the past year at request of a number of American oil companies to supplement current data on the domestic production of natural gosoline and world production of crude petroleum. Information was assembled from official publications of foreign governments; through the cooperation of consular and comr mercial representatives in various foreign countries; and through the assistance of a number of companies operating in foreign countries

During the period covered by the survey, United States production accounted for more than 9 0per cent of the world total, but the output of foreign plants formed an increasing proportion of the total, advancing from 5.8 per cent of plants formed an increasing proportion of the total, advancing from 5.8 per cent of the total in 1927 to 8.6 per cent in 1929. The relative proportions of domestic and foreign production of natural gasoline are shown in the following table:

Of the 1929 production of 5,017,-309 barrels reported for foreign countries, approximately 2,000,000 barrels were mixed with crude and transported from producing properties, the quantity of natural gasoline production being included in the figures of crude oil production, while the remaining quantity was transported separately either by pipeline, tanker, or tank car, to refineries for blending with naphthas in the production of motor fuel. Aside from the United States ,natural gasoline production was reported for 16 countries, Netherland East Indies, Peru, Persia, Rumania, Russia (U. S. S. R.) Poland, Colombia, Venezuela, Argentina, British India, Japan and Taiwan, British Borneo, Egypt, Merico and Trinidad A limited production was reported for Canada in 1927 and 1928 but none for 1929. Among the countries to which inquiries were sent and which reported that no natural gasoline was being produced were Brazil, Czechoslovakia, Ecuador, Estonia, France, Germany and Italy. It was reported also that a small quantity of natural gasoline had been produced in Australia, but not to the extent of a commercial operation.

Of the production reported for the Netherland East Indies during 1929, approximately 600,000 barrels were mixed with crude and the balance transported to refineries for blending in the production of motor fuel. All of the production reported for Peru was transported by pipeline to Talara for blending with the gasoline produced at the refinery. Of the 1929 output of 726,190 barrels, 643,-214 barrels was reported as the production of gasoline plants at La Brea and Parians and 82 976 barrels from Lobitos. All of the Persian production is blended with crude in the field and transported by pipeline to the Abandan refinery, the natural gasoline being included in the annual reports of crude oil productio. In Rumania, Russia and Poland natural gasoline is handled almost entirely apart from crude oil and the output is not included with crude oil production.

All of the Colombian production and virtually all of that in Venezuela is mixed with crude oil and included in the figures of crude oil production. The Argentine production is shipped by rail or boat to refineries and is not included in the crude oil production figures. It British India, some portion of the natural gasoline output is handled separately by pipeline and the remainder is turned into crude oil pipelines and included with the crude oil production. The Japanese production, as well as that in Taiwan, is handled separately from thecrude oil production.

RUSSIAN MINERAL OIL

A pure Russian Hydrocarbon Mineral Oil free from odor and taste. Used in the treatment of Chronic Constipation and as a mild laxative. Also a lubricant for relief of intestinal auto-intoxication.

HIGHWAY PATROL KEEPS RECORD OF VIOLATIONS

Complete records will be kept hereafter of all persons convicted in California of major violations of the motor vehicle act, it was announced by officials of the California Highway Patrol.

These records will be kept in alphabetical order thus enabling the patrol to keep check on the hagitual violator by noting each new offense committeed.

The records will be taken from abstracts of convictions forwarded to the patrol by court officers as provided under Section 156 of the act. Should two or more major violations by the same person be recorded within a short period, the patrol will make an investigation and either warn the offender or cause his license to be cancelled.

A similar system of records covering drivers involved in major accidents was inaugurated some time ago and is functioning satisfactorily it was announced.

Working under the supervision of Superintendent E. R. Cato, the bureau of statistics is now checking the records of the 119,879 convictions of violations or forfeitures of bail reported during 1930. The officials estimate this is about 80 per cent of the total number of convictions during the year, many justices and court officers failing to report their abstracts as required by law.

Of the total reported, 49,300 were from Los Angeles County courts, 7,835 from Alameda, 6,697 from San Diego and 5,631 from Riverside.

Court officers were urged to assist in increasing the efficiency of the new records by reporting all convictions as required by the act.

MONTHLY COMMERCIAL MINERAL NOTES

No. .95—February, 1931

Names and addresses corresponding to key numbers are on file in the following offices of the State Division of Mines: Ferry Building, San Fracisco; New Orpheum Building Los Angeles; State Office Building, Sacramento, and Care Chamber of Commerce, Redding. Upon request the name and address corresponding to any key number will be supplied.

WANTED

93-14—Black sand concentrates, containing gold, platinum iridium, thorium or other rare metals.

93-15—Barite deposit.

93-16 — Bentonite; white, large tinge. Also tungsten ore; 15 per cent or better.

93-17—Gold quartz mine; prefer with some developed ore; average mill grade. Also black sand deposit carrying gold and platinum.

93-18—Black sand concentrates, carrying gold and platinum, large or small lots.

93-19—Gold Placer or quartz mine; buy or lease on royalty.

93-20—Rough turquoise or malachite or gem quality.

93-21—Lead carbonate mine or dump; mut have water. Also lead mine with low silver content; large tonnage.

93-22—Chromite; not less than million-ton deposit. Also gold quartz mine or prospect. Must have control, 51 per cent or better; will pay cash.

93-23—Manganese and barite ore; large tonnage.

93-25—Sphalerite and sheelite; tonge. Also placer black sand.

Run-Down, Weak, Nervous?

To have plenty of firm flesh and the ability to do a big day's work and feel "like a two-year-old" at night, you must relish your food and properly digest it. If you can't eat, can't sleep, can't work, just give Tanlac the chance to do for you what it has done for millions.

Mrs. Fred Westin, of 387 E. 57th St. North, Portland, Ore., says: "Tanlac cured my stomach trouble completely after three years suffering. It built me up to perfect health, with a gain of 27 lbs."

Tanlac is wonderful for indigestion —gas pains, nausea, dizziness and headaches. It brings back lost appetite, helps you digest food, and gain strength and weight. No mineral drugs; only roots, barks and herbs, nature's own medicines. Less than 2 cents a dose. Get a bottle from your druggist. Your money back if it doesn't help.

BILL INTRODUCED BY CONG. TIMBERLAKE

The following bill was introduced by Congressman Timberlake:

In the discussion preceeding the passage of the bill it was brought out that the production of the mines were not the fruit but that when minerals were being produced the owners were actually using up their capitol which was limited by nature. The very fact that wealth of the mine was in reality an unknown quantity makes it more essential that the depletion be allowed. The same is true of gas and oils.

To amend the Revenue Act of 1928 relating to depletion of mines.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 114 (b) (2) of the Revenue Act of 1928 is amended to read as follows:

"Percentage depletion for mines. —In the case of mines the allowance for depletion shall be 33 1-3 per centum of the taxpayer's net income as defined in section and (b) excluding such items of gross income and deductions as are not directly attributable to the operations of mineral or metal production from the property), except that in no case shall the depletion allowance be less than it would be if computed without reference to this paragraph."

LOOKED QUEER

The Bride (indignantly)—I never was so embarrassed in my life!

The Groom—Why, whassa matter, dearie?

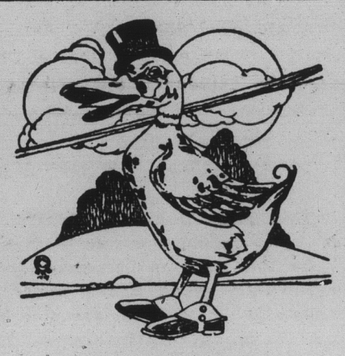
The Bride—All through the wedding ceremony you had your eyes glued on the side door marked "Exit," and the best man actually started two or three times to grab you as if he thought you were going to make a dash for it.

Carry On

Pat, who was moving, had asked one or two of his friends to carry his chicken-house round for him.

They found this a very strenuous job, but struggled on. About halfway they set the coop down to have a rest when one of them suddenly exclaimed: "Why, where's Pat?"

"I'm all right," came a voice from inside the house, "I'm carrying the perches."—Exchange.



DON'T DUCK.

LEGAL NOTICE

SUMMONS

In the Superior Court of the State of California, in and for the County of Nevada.

In the Matter of the Estate of NANCY C. MOTT, Deceased.

Notice is hereby given by the undersigned, George M. Mott, Jr., as the Executor of the Last Will and Testament of Nancy C. Mott, deceased, to the creditors of and all persons having claims against the said deceased, to file them with the necessary vouchers within six (6) months after the first publication of this notice in the office of the Clerk of the Superior Court of the State of California in and for the County of Nevada or to exhibit them ,with the necessary vouchers within six (6) months after the first publication of this notice to the said Executor the Bank of America National Trust & Saving Association, Broad street, Nevada City, California, the same being his place of business for the transaction of the business of the estate.

Dated March 6, 1931.

GEORGE M. MOTT, JR.,
Executor of the Last Will and Testament of Nancy C. Mott, Deceased.

GEORGE L. JONES,
Attorney for Executor.
First publication March 6, 1931.

SUMMONS

In the Superior Court of the State of California, in and for the County of Nevada.

LONZO W. WINNEY, Plaintiff, vs. BONITA B. WINNEY, Defendant.

Action brought in the Superior Court of the State of California in and for the County of Nevada ,and the Complaint filed in the office of Clerk of said County of Nevada.

Harry M. McKee, Attorney for Plaintiff.

The People of the State of California Send Greetings to BONITA B. Winney, Defendant.

You Are Hereby Directed to Appear, and answer the complaint in an action entitled as above, brought against you in the Superior Court of the State of California in and for the County of Nevada within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any relief demanded in the Complaint.

Given under my hand and seal of the Superior Court of the State of California in and for the County of Nevada, this 20th day of January A. D. 1931.

R. N. McCORMACK,
Clerk.
By R. E. Deeble, Deputy Clerk.
(SEAL)

NOTICE TO CREDITORS

In the Matter of the Estate of KITTY F. ENGLEBRIGHT, Deceased.

NOTICE IS HEREBY GIVEN by the undersigned Harry L. Englebright as Administrator of the Estate of Kitty F. Englebright, deceased, to the Creditors of and all persons having claims against the said decedent to file them with the necessary vouchers within six (6) months after the first publication of this notice in the office of the Clerk of the Superior Court of the State of California, in and for the County of Nevada, or to exhibit them, with the necessary vouchers within six (6) months after the first publication of this notice to the said Administrator at the office of W. E. Wright, Nevada City, California, the same being his place of business in all matters connected with the estate of said Kitty F. Englebright, Deceased.

Dated January 9th, 1931.

HARRY L. ENGLEBRIGHT,
Administrator of the Estate of Kitty F. Englebright, Deceased.
First publication January 9, 1931.

N. C. N. G. R. R. COMPANY TIME TABLE

Effective Sunday, Dec. 28, 1930.

Trains leave Nevada City at 4:45 a. m., Grass Valley 5:05 a. m., arriving at San Francisco 1:30 p. m.

Trains leave Nevada City at 8:50 a. m., Grass Valley 9:15 a. m., making direct connection with S. P. train No. 19 arriving at San Francisco 3:30 p. m.

Train leaves Nevada City at 4:10 p. m., Grass Valley at 4.35 p. m, daily except Sunday, making connection with S. P. train No. 20, leaving San Francisco at 12:40 p. m., enabling passangers to arrive at Grass Valley 6:55 p. m. and Nevada City 7:16 p. m., daily except Sunday.

Train No. 24 leaving San Francisco at 8::00 a. m. arrives at Grass Valley at 2:10 p. m. and Nevada City 2:30 p. m.

STAGE TIMETABLE

Graniteville Stage leaves Nevada City at 7 a. m., for Lake City, North Bloomfield, Moores Flat, and Graniteville. Leaves Graniteville at 7 a. m., for Nevada City.

Alleghany Stage leaves Nevada City daily, except Sunday at 1:00 p. m., for Tyler, Columbia Hill, Alleghany and Forest. Leaves Forest at 6:30 a. m., for Nevada City.

Marysville Auto Stage leaves at 8.00 a. m., for Rough and Ready, Smartsville, Hammonton and Marysville. Leaves Marysville at 1:00 p. m. Conneots at Smartzville for North San Juan.

Downieville Auto Stage leaves Nevada City daily at 1 p. m., arrives Downieville daily at 6 a. m., arriving in Nevada City in time to connect with 10:30 train for San Francisco.

Washington Stage leaves Nevada City at 6:30 a. m., for Washington leaves Washington at 6:30 a. m., at Nevada City.

CALIFORNIA HAS 700 QUAIL SANCTUARIES

California now has more than 700 quail sanctuaries, according to a report by Walter R. Welch, captain in charge of volunteer deputies of the Division if Fish and Game. These established by farmers and land owners and are scattered over the entire area of the state. The work is progressing rapidly.

It is estimated that these protected lands comprise about 500,000 acres of sultable quail habitat and that about 225,000 birds are sheltered in the area. These birds will act as the breeding stock from which the hunting grounds of the state will be replenished. Welch says that it will take at least three years, under favorable conditions to bring the favorable conditions, to bring the quail supply back to a safe margin from extermination.

In glancing at the sanctuary, details show that the smallest refuge is located near the city of Walnut Creek, Contra Costa County, and consists of about three acres. Despit this small area a number of fine birds are said to be thriving under the absolute protection.

The largest sanctuaries are located in Monterey and Lassen counties and comprise an area of about 22.000 acres. These large tracts of land are patrolled regularly by mounted deputies and every effort is being made to provide ideal conditions for quail.

Careful watch is kept for animals and birds that show any tendency to prev on the quail and the stomachs of all such alleged predators taken are sent to Captain Welch for examination. In this way a complete control of such enemies of the puail is possible, and a record is kept that will be a valuable asset in the work of conservation. A summary action is also taken against all hunters who invade the closed areas.

CAMPTONVILLE ITEMS

CAMPTONVILLE, Mar. 6.—(Special to The Nugget.)—The subscription list for the repair of the local Masonic Hall has been growing since it was started several months ago, and the community committee consisting of Miss Emma J. Ramm, Mrs. F. S. Labadie and Acton M. Cleveland, hope to be able to get the work done and the improvements made during this spring. The hall is used by the general public of the community for all affairs, such as school programs, church, funerals, dances, public meetings, etc., for which it is always used without charge and the people of the community have responded very fittingly to make it a better place for such purposes.

J. P. Smart made a brief visit at French Corral Wednesday.

Dr. Carl P. Sutton of Downieville was in this section Wednesday called by the illness of Mrs. M. A. Godfrey at Oak Valley.

Miss Dorothy Dyke and party of friends of Grass Valley had dinner at the Hotel Francis Wednesday evening.

Mrs. F. S. Labadie and Mrs. Acton M. Cleveland motored to Marysville on a short visit.

Chas. Ennis and W. H. Walker of North San Juan were in town Thursday on a short visit.

Ray Knickrem and Chester U. Hanson motored to Nevada City Wednesday on a short visit.

Forest Ranger Frank W. Meggers returned after an absence of two months during which time the traveled from San Francisco through the Panama Canal to New oYrk, thence to Wisconsin, his old home, from which place he motored west in a new car. His many friends were glad to give him a hearty welcome.

W. H. Cartwright of Grass Valley passed through towa Thursday en route to the upper country.

C. H. Greene of Grass Valley was a business visitor in town Thursday.

Fred Joubert returned Thursday evening from a few days of business at San Francisco.

Mr. and Mrs. Fred J. Joubert and Mrs. Action M. Cleveland on Main Sacramento Saturday. Misses Geraldine and Earlyne Cleveland, who have been visiting their grandparents at Sacramento retured with their mother.

James M. King of Nevada City was in town Sunday on a short visit.

Mrs. Kate Hope Livingston, local high school teacher and member of the County Board of Education, returned to her home here Saturday after spending the winter at Los Angeles. Her grandson Livingston Cloman returned with her.

Miss Earlyne A. Cleveland celebrated her fourth birthday Sunday at the home of her parents, Mr. and Mrs. Acton M. Cleveland on aMin street. A number of relatives were present and the event was marked by a dinner. The following were present: Mr. and Mrs. Fred J. Joubert, Judge and Mrs. William B. Meek, Mr. and Mrs. Acton M. Cleveland, James L. Joubert, Geraldine L. Cleveland and Earlyne M. Cleveland.

Mrs. M. G. Calvin entertained a number of friends and relatives at her home Sunday in honor of her birthday, a fitting dinner having been enjoyed for the occasion. The following were present: Mr. and Mrs. Leonard L. Bishop, daughter Dolores, Mr. and Mrs. Eugene H. Hays and daughter Dorothy, Mrs. Ella Hays and August Neimard, Browns Valley, Ben Hartling, Downieville, Mrs. Ida Ramm, Mr. and Mrs. M. G. Calvin.

Mr. and Mrs. Joseph Lavezzola, and daughter of Downieville, spent Tuesday and Wednesday in town visiting relatives.

District Attorney J. M. McMahon of Downieville was in town Tuesday on official business.

Fred H. Butz motored to Sacramento Thursday on business.

NEW GEOLOGICAL MAP FOR CALIFORNIA

Mr. George W. Stose, geologic map editor, U. S. geological survey, recently in San Francisco to confer with the geologic branch of the California State Division of Mines as regards the new geologic map of the state which the two surveys (state and federal) are preparing through a cooperative arrangement.

Mr. Stose arrived in San Francisco about February 8, and at that time confered with Mr. Walter W. Bradley, state mineralogist and Mr. Olaf P. Jenkins, chief geologist, who is in charge of the preperation of the map.

Mr. Stose also confered with many other geologist in California, first in Los Anggles and Passadena, before arriving in San Francisco. There is much interest among members of the proffesion at this time as regards the preparation of this valuable piece of work and much cooperation is being secured from all institutions, and geogolical departments of mining, oil, and railroad companies.

According to the arrangement made, the federal survey has been compelling all information that was available to it in Washington, D. C. There is, however, as much more information unpublished and in various files here in California as in the office of the U. S. geological survey. It becomes the duty, therefore, of the state division of mines to complete this map as far as possible with data it has secured, and to continue to fill in the gaps as fast as the required data are obtained through field work.

The general state geological map is being drawn on the scales of eight miles to the inch and will show clearly and accurately all of the principal geologic formations exposed on the surface. A mape of this sort will be of widespread importance and value to all mineral resources, mines, oil and gas, water supply, agricultural and forest industries, transportation lines, etc. At a glance the reader, traveler, or engineer may see on just what rock formation he is located and what its relation is to the rest of the state. The main geological structures, faults, etc., will be shown. The map as a whole will be of constant service and education to the world at large. Investors visitors anr travelers will use it as a constant source of information.

The state is very fortunate in seuring the service of men well trained and experienced in making such state maps. Mr. Stose has been in charge of editing and engraving these maps and all geologic maps for the U. S. geological survey for many years. Mr. Jenkins, a few years ago, prepaired such a map of the entire state of Tennessee, doing much of the field work himself, and later was employed in the preparation of the map, which was published jointly by Arizona and U. S. geological survey. The Mining Journal

ALL NEW YORK GETS TELEPHONE CHANGES

When every telephone number in New York City was changed, last December, by the introduction of an identifying digit associated with each central office name, the telephone habits of several million New Yorkers were considerably altered. They have taken to the new numbers with little confusion and characteristic good nature, however, and one more problem of furnishing telephone service in the world's biggest city has been solved for many years to come.

By the end of last year there were 193 telephone central offices in New York City, each with its identifying name: Ambassador, Bowling Green, Cenal, etc. Among other requirements, every central office name must sound different from all the others when spoken, and each must begin with letters which do not make the same combination, when dialed as any other name.

Single Digit Proves Solution

The number of telephones in New York City has increased so rapidly during the last ten years that the limit of usable names which meet these two requirements would soon have been reached. It has been evident for some time that a numbering plan must be adopted which would provide adequately for the large increase in telephones necessary to serve the city in the future.

The solution has been found by introducing a digit between the name and the line number, while leaving the latter unchanged. Thus a telephone number which was formerly listed as AMBassador 5900 now appears in the directory as AMbassador 2—5900. When given to an operator, the number is spoken just as it looks. When placed from a dial telephone, the first two letters and the five numerals are dialed, instead of the first three letters and the four numerals as before.

In introducing the new numbering plan, the office numeral was inserted after the existing central office name as the first step, since this method resulted in the least change in the city's telephone service. No existing central office names were eliminated and no names were assigned to more than one office. As soon as the new method of calling is thoroughly understood by telephone users, new central offices will be given the name of some existing office, but with a different office numeral. Some of the less desirable existing central office names will gradually be discontinued.

Future Neds Well Cared For

This plan provides for an ultimate of 63 usable names, each name caring for ten central offices, instead of only one as at present. The plan therefore provides for a total of 630 cetral offices in New York City, and will meet the telephone numbering plan requirements far into the future. The present generation of telephone engineers is through with that particular problem at any rate.

ASSESSED VALUATION OF MINES AND FARMS

There is really no difference in the methods of arriving at the assessed valuation of mines and farms, although many soap-box orators would have you think so. Both mines and farms are first assessed on the physical valuation of the equipment, power plants, mill, hoists, etc., for the mines, and tractors, cultivators, hay balers, etc., for the farms. They are both charged up with the value of the buildings, even the plaza orators will concede that there is no difference so far.

Now comes the farm or the mine stripped of its buildings or machinery, they are both taxed on the basis of their earning power. Here the soap-box orator will disagree. Farms are taxed at so much an acre. That is true, but how is the value per acre determined?

tI is based upon the agility of that land to produce. If it is water-soaked alkali land, it produces little, is worth little and is taked for little. If it is used to raise alfalfa, it is valued in accordance with its alfalfa producing ability. If it is turned to citurs, the owner asks a higher price because land in citrus will make a higher net return. It is the net return attainable from land that fixes the price which the owner will ask and which, likewise, fixes he assessed valuation.

For example, if a tenant could pay $160 a year rent on a farm, then the proper price of the farm would obviously be $2000, if eight per cent were deemed a fair return to cover taxes, interest or profit on investment.

"Save in one vital respect, the method of valuing a mine is identical," says L. C. Graton, one of the world's leading mining authorities, in his booklet, "Mines and Mine Taxation." "The one essential difference between farms and mines so far as valuation is concerned is in the matter of duration, or life. A farm, if given reasonable and proper management, is presumably good forever.

"The capital value resides in the farm in perpetuity. But the mine suffers injury and progressive destruction through the act of operation. The purpose of operation is to produce metal and each year's operation therefore depletes the mine. In contrast with the farm, whose capital remains constantly intact, the mine becomes less and less valuable until at last, when all of its ore has been exhausted, it is valuelsss.

"Obviously, then, the proper value of a farm yielding $160 a year will not be the same as the proper value of a mine yielding $160 a year, for the byer of the farm can at any time get his money back by selling, wheras the mine will be worth less and less each year." Mining Journal

TO RELIEVE MONETRY CONDITIONS IN U. S.

Throught The West and other minjng regions of the country all eyes are geing turned on Washington and the President of the United Statesin a gaze of hopeful expection that serious consideration will be given to the report that has been submitted by Senator Key Pittman and his earnest co-labories in their search for a remedy to relive the blistered and blasted monetry conditions that have wrought such havoc and demoralization in the trade and industral relations of the world during the past few years.

Many of the gest posted men in the metal mining industry-heads of huge smelting, metallurgical and mining concerns-have labored industriously and spent much money to educate and enlighten the captains of hige finance and international trade and commerce concering what would should they perist in the determination to degrade and destroy the natural function of a metal recognized from time immemorial as a basic representive of value in barter, and industral supremancy.

Finally, in the midst of chaotic conditions precipated by the world war, far-seeing men of affairs began casting about for a means of stemming the tide of stagnation that was insiduously but preceptibly creeping into the channels of trade and industry. Something must be done-that was admitted-but what? Every country seeking commercial and financial supremancy was advising that a gold standard must be established-that silver, as money, must be cast into the discard and, as the fighting Irishman said: "At it they wint."

But the advocates of silver began to explain to them the mistake that was being made; that a great majority of the people of the world could not get along withont silver-that printed paper tokens of value meant nething to them; that silver must be recognized and given an established monetrary value on SOME basis with gold.

Now the men and mining institutions of the world are compelling Mr. High Finance to see the light. And, be it said, the men and institutions of the West have been able to force the issue, similary as they did when the metallic wealth of the Comstock mines saved the country's credit as everything "whent to pot" in Cival war rescontruction days. conference, as he is repuested to do, and as he unquestionably will do with as little delay as possible. The turn of the tide is at hand.—Mining Review.

FRENCH CORRAL ITEMS

FRENCH CORRAL, March 5.—(Special to The Nugget)—The balmy entrance of March couldn't but make the heart feel glad and encourage all to begin anew. Yet the wiseones are filled with sad misgivings about water for the summer. Let us hope the "old lion" will get busy toward the exit and make some provision for summer moisture.

Many are getting ready their vegetable gardens and flower gardens and prunning the shrubbery, etc. This wonderful weather is involving all to outdoor work.

Harry Browning made a trip to Forest Hill Tuesday, where his father, A. Browning and brother Clyde have gone to work.

Mr. and Mrs. DeGuire of Nevada City visited friends here during the week.

Messrs. C. Hicks and H. Ike of Marysville, in company with W. R. Clerkin were visitors here Wednesday. Those gentlemen are working in the interest of the association recently organized in Marysville, called the "Trails of '49". This association is working to establish a museum for relics of the early days, where said relics may be taken care of and preserved for all time. It is in no way sectional and will be glad to receive relics and data from any part of the state and if at any time a museum is established in any county said relics will be returned by request. They are also working to trace out the old Hennessee Pass Emigrant trail with view of placing markers. The museum is situated on the "old camp ground" at the end of this trail. Any information in this line will be gladly received by W. P. Clerkin, a member who is doing a great deal of research work to have this trail traced out and marked. Right here we wish to express our appreciation of the work Mr. J. L. Wolff is doing in establishing facts pertaining to the early history of the San Juan Ridge. Here in the old Moulton office in French Corral the first long distance Edison telephone was established. We will hear more of this later.

Mr. Henry Davis and son Harold of Ripon were visitors during the week. Mr. Davis spent his boyhood days in Sweetland and is always glad to visit the old Ridge.

Mr. J. Monoghen and R. Hardenbrook spent a few days in Grass Valley during the week where Mr. Monohan went for medical aid.

Mrs. Annie Browning is visiting the family of her son, A. Browning, since Sunday.

Mr. ad Mrs. F. Rundy of Sacramento were Sunday visitors. Both are ex-residents of the San Juan Ridge.

Mr. and Mrs. Geo. M. Fisher of Sacramento are spending some time in French Corral. Mr. Fisher is a native of this place.

W. P. Clerkin and H. Hoskings went to Brownsvalley Monday to move some cattle on the upper ranges.

Clyde Browning and Miss V. Day were Sunday visitors.

Miss M. Clerkin is visiting in French Corral.

LOCAL HAPPENINGS

Judge Raglan Tuttle, who has been ill at his home on Zion street for sometime past, is able to be about again.

Mr. and Mrs. Donald Grover have returned to their home in San Francisco after spending a few days with Mrs. Kitty Williamson.

Charles Y. McCormack of Allegheny who has been at the Nevada City Sanitarium under treatment, has gone to San Francisco to be with relatives .

Mr. and Mrs., Ed Clunes of Brytola and George W. Jones of San Jose are the guests of Mr. and Mrs. George L. Jones over the week-end.

The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

Mighty Title Borne by Many Unworthy Rulers

Caesar was a title assumed by Octavianus, adopted son of the great dictator, Julius Caesar, and was by him handed down to his adopted son, Tiberius. It continued to be used by Caligula, Claudius and Nero as members, either by adoption or female descent of Caesar's family; but though the family became extinct with Nero, succeeding emperors still retained the name as part of their title, and it was the practice to prefix it to their own names, as Imperator Caesar, Domitianus Augustus. When Hadrian adopt-Aelius Verus, he allowed the latter to take the title of Caesar, and from this time, though the title Augustus continued to be confined to the reigning emperor, that of Caesar was also granted the second person in the state and the heir presumptive to the throne. After the death of Nero, his name was adopted as a kingly title by succeeding Roman emperors. This practice continued, and the same title was used in modern times, as in the case of kaiser and czar.

Source of Fabled River Styx Merely Waterfall

Solos, a village on the slopes of Mount Helmos, not far from Akrata in the division of southern Greece known as Achae, is near the supposed site of the fabled River Styx. In Greek mythology the Styx is a mighty river, the tenth part of the water of Oceanus, which flows in the lower world. It is described by Homer and Hesiod as the terrible black water falling from a high precipice and dashing itself upon a lofty rock, through which it passed and then fell into the Crathis.

The fabled waters of the Styx have been identified by students of antiquity as the two slender cascades falling over a high perpendicular precipice of Mount Helmos, near Solos. After winding among a labyrinth of rocks the water unites to form a mountain torrent which eventually joins the River Akrata (Crathis). Superstitious feelings of dread still attach to the water, which is considered of a peculiarly noxious character.

Pliny Stirred to Wrath

Those who have watched some volunteer fire companies in action will be amused by the fact that Pliny got all wrought up about this matter of fire-fighting back in 106 A. D., writes Joseph T. Armstrong in the New Orleans Item-Tribune. In a letter to the Roman emperor Trajan, Pliny described a fire at Nicomedia, which consumed several homes, the town house and the temple of Isis.

Pliny indignantly blamed this damage in part to "the indolence of the people, who manifestly stood idle and motionless spectators of this terrible calamity." He said there were in the town "neither engineers, buckets nor any single instrument suitable for extinguishing fires," and recommended that a company of 150 firemen be formed.

White House Baths

"Charming Dolly Madison," one of the most gracious of White House mistresses, set aside rooms for bathing, and instituted the first Presidential bathtubs. These bathtubs remained in the White House only until the entrance of Andrew Jackson, first plebeian President, who promptly chucked them out of doors for representing something decidedly undemocratic, and therefore offensive to the common people. However, the bathtub returned with the fastidious Fillmore to remain evermore enshrined, although the Fillmore tub has long since been replaced.

Too Big to Lose

Billy Brown was dreaming of the glorious game of football he was going to have as soon as he got out of school. He wasn't a bit interested in the elephant, which was the subject of the lesson to which he ought to have been listening. The teacher saw this and pounced on him.

"Brown, where are elephants found?" he demanded sternly.

Billy was staggered for a moment, but rose gallantly to the occasion.

"P-please, sir," he stammered, "elephants are so big that they're hardly ever lost!"

Mental Test

An agent recently called on a north side mother trying to interest her in a set of books. Junior was peering through the pages so the caller showed him some pictures under "Mental Test." One picture was that of a wagon without the "handle." After asking Junior several questions the woman enlightened him by saying that the wagon didn't have a handle. Turning to a picture of a pig without a tail the youngster studied it intently for a few moments and said, "Why, the pig doesn't have a handle, either." —Indianapolis News.

Great Names for Small Towns

That many Americans have traveled in Europe might be deduced from the trails of European names throughout the United States. Paris and Berlin are each to be found in 15 states, while seven undeveloped Londons, ranging in size from 100 to 4,000 population, might be visited in a domestic grand tour. Arkansas is the proud possessor of all three, and in addition has a Peking. Peking is to be found in four other states also. —Cleveland News.

DISCOVERS NEW CAVES IN LAVA BEDS AREA

New discoveries were made in the Modoc Lava Beds region recently by a party headed by Forest Supervisor F. P. Cronemiller, Jr., of the Modoc National Forest.

While the scores of large caves and other natural curiosities existing elsewhere the Lava Beds National Monument as well as point of historical interest are quite familiar to the forest rangers, a large den in the center of the national monument has remained practically unexplored by the government officers. Even J. D. Howard of Klamath Falls, an authority on the Modoc Lava Beds, who has mapped most of the caves in the region, has not made any extensive survey of this particular area.

The chief discovery made by Cronemiller and his companions was a large cave about two miles west of Juniper Butte, the entrance to which was accidentally found by Road Foreman Dan A. Davis sometime ago. The entrance to this cave is a yawning hole about twelve feet square which droops off sheer. The floor of the cave is about fifty feet below the surface of the ground and Cronemiller and James F. Gassoway, an employe of the forest service, ventured into the interior by means of a rope ladder.

While access to the interior of this big cave is by no means easy, the forest service men found that some adventurous spirit had been there before them.

It is rather surprising that some vanquero in past years has not accidentally ridden into this deep pit since the hole drops sheer from level ground to old time cow punchers is evidenced by a high cairn of rocks visible for a good distance. This marker was evidently built about fifty or sixty years ago, probably about the time when this section was known throughout the West as the range of the Fairchilds and Dorris interests.

Cronemiller's party also discovered four other large caves in this vicinity. One of these rivals any of the large caves further south. Several hundred feet long ,its roof is perfectly domed and the floor is almost as smooth as a city pavement.

Another one nearby is a daylight cave in which Nature outdid herself in the matter of providing light. Its roof about forty feet above the smooth floor, is pierced by two large skylights, and as the entrance at both ends is a gradual descent, it is much used by wild animals. From evidence found in the cave it has also been much used in past years during winter months by sheepherders who range their flocks on the surrounding range.

In this cavern also the officers found a sealed glass jar containing the names of people who had visited the cave many years ago.

Since these new caves are well off the beaten track and far from any traveled roads, very few people will visit them, the rangers say.

GOOD RUN OF STEEL TROUT IS REPORTED

A very good run of steel head trout was reported in the streams south of San Francisco several days ago by sportsmen in this district. Although some of these waterways carried a depth of only twelve inches at the mouth some very sizable fish were noted passing through.

One angler reported that several limits were taken within a few minptes after the lines were cast into the stream. In all cases the fishermen appeared satisfiel with their catches and departed within a short time after their arrival.

Some of the old timers said that they had never seen the fish in such a sportsmanlike manner before, and wardens of the Division of Fish and Game verified the reports. Warning was given to two adventurers, armed with a hayfork, who were loitering along the banks of a river.

RAIL HEAD EXTOLLS ADVERTISING'S PART IN GROWTH OF WEST

Efficacy of advertising in the development of the west and the essential need not only for maintaining but increasing this advertisig to cope with icreasing competition from other sections, are stressed in an article released for publication here by Felix S. McGinnis, vice president of the Southern Pacific company in charge of system passenger traffic.

Writing for the Februarw issue of Western Advertising and Western Business, the rail executive attributes much of the phenomenal grouth and cities the supplemental and strengthening force of individual advertising by railroads and steamship lines.

"Advertising's importance in our modern ecouomic life is so well reognized that we can concede, without argument, that it has been a factor in the progress and development of our western country," McGinnis writes. " But the extraordinary extent of the influnce of advertising on western grouth has been so much greater than in other parts of the country that its primary importance may not be generally recognized."

Declaring that the people of the Pacific Coast have been "notably advertising-minded" since the early history of this region, the exective adds: "The ability to get together and cooperate is a chararteristic of the West. It is well exemplified in both community and industrial advertising. It may been forced by the preasure of economic circumstances, but the fact remains that co-operative actions is making advertising more effective, and advertising, on the othef hand, is helping to increase community and regional consciousness.

"Advertising, of course, is but one factor in our western growth. But the general appreciation of advertising as a force, plus the energy and initiative to apply it, coupled with ability and desire to work together and to coordinate effort has made advertising on the Pacific Coast a most active element in our progress. We have had a good produce and we have worked together to get the most out of advertising in selling it."

Rev. H. Buckner and Dr. Gale spent Wednesday in Downieville.

William Coppen of Strawberry Valley, Yuba county, was a business visitor in this city Wednesday.

Wave Kesserling, traveling representative for Carlisle and company is here on his regula business visit.

Why we spend $2,000,000 to put CAMEL cigarettes in the new HUMIDOR PACK

WE have been in the tobacco business a long time down here at Winston-Salem and we take a lot of pride in the quality of the cigarettes we make.

While we have spent a good many million dollars advertising Camels, we've always held to the old fashioned idea that the thing that really counts is what we put into our cigarette and not what we say about it.

If we know anything about tobacco, and we think we do, Camels contain the choicest Turkish and the mellowest, ripest domestic leaves that money can buy.

In fact we have every reason to be proud of the quality of Camels as they come from the factory, but the remark of an old friend of ours from Denver some time ago emphasized a point that has been the problem of the cigarette industry for years.

As he inhaled the smoke from a Camel we gave him in our offices one morning, he sighed with very evident enjoyment and then asked jokingly, "What is this, a special blend reserved for Camel executives?"

"Certainly not," we told him. "This package of Camels was bought at the corner store this morning."

"Well," he said, "I've been a dyed in the wool Camel smoker for a good many years, but upon my soul I never got a cigarette as good as this in Denver. If you would give the rest of the world the kind of Camels you sell here in Winston-Salem, you ought to have all the cigarette business there is."

THAT statement simply emphasized again the cigarette industry's most important problem. The more we thought about it, the surer we were that he was dead right, and that *somehow*, something must be done.

Denver *wasn't* getting a fair break. Neither in fact was any other town. The only people who really knew how good Camels could be, were the folks right here in Winston-Salem.

That was due to a factor no cigarette manufacturer had ever been able to control.

Naturally there is no difference whatever in the quality of the tobacco in Camels, whether you buy them in Winston-Salem, Denver or Timbuctoo. But up to now there has been a very real difference in the *condition* of the cigarettes by the time they reached the smoker.

The flavor and mildness of fine tobacco depend upon the retention of its *natural, not added, moisture content* which is prime at about ten per cent.

In spite of our great pains always to make sure Camels left the factory with just the right amount of natural moisture, no cigarette package had ever yet been designed that could prevent that precious moisture from drying out.

THERE are three things about a cigarette that can sting the tongue and unkindly burn the throat.

(1) ***Cheap tobaccos.***

(2) ***Particles of peppery dust left in the tobacco because of inefficient cleaning methods.***

(3) ***A parched dry condition of the tobacco due to loss of natural moisture by overheating or evaporation.***

Always certain of the quality of our tobaccos we had already made Camel a "*dustless*" cigarette by the use of a specially designed vacuum cleaning apparatus exclusive with our factory.

Now, if we could perfect a package that would actually act as a *humidor* and retain the natural moisture content, then Yuma, Arizona, could enjoy Camels as much as we do here at Winston-Salem.

We knew what we wanted. We tried many things. We asked the Pittsburgh Testing Laboratory to help us.

After many experiments and humidity tests covering all methods of packing cigarettes came the detailed report of which this is the net:

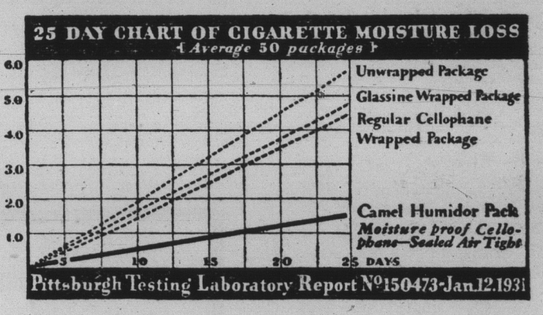
(*A*) *No existing cigarette package, including those wrapped in glassine paper or ordinary cellophane*, gives anything like adequate protection against evaporation.

(*B*) *All cigarettes so packed tend to dry out rapidly* from the day they are released from the factory.

(*C*) *Only a waterproof material with a specially devised air-tight seal* could give the desired protection.

(*D*) *This measure, while costly*, could be relied on to keep Camels in prime condition for at least three months in any climate.

If you have a technical bent, the graph below made by the Pittsburgh Testing Laboratory will show you the exact results of their exhaustive study.



Pittsburgh Testing Laboratory chart above graphically shows you that only the Camel Humidor Pack delivers cigarettes to you in prime condition

YOU may be sure we gave this report a lot of careful study. We checked it and re-checked it and then we went ahead. We tried this device and that. At last we met success. The air-tight wrapping involved the designing of special processes, special machines.

That costs a lot of money, more than $2,000,000 the first year, but after you have tried Camels packed this modern new way we are sure you will agree it is a fine investment.

For some time now every Camel that has left our factory has gone out in this new Humidor Pack.

We have said nothing about it until now, to make sure your dealer would be able to supply you when the good news came out.

Camel smokers of course have already discovered that their favorite cigarette is better and milder now than ever before.

If you aren't a Camel smoker, try them just to see what a difference there really is between harsh, dried out tobacco and a properly conditioned cigarette.

You can *feel the difference*, you can *hear the difference* and you certainly *can taste the difference.*

Of course we're prejudiced.

We always *have* believed that Camel is the world's best cigarette.

Now we know it.

Just treat yourself to Camels in the new Humidor Pack and see if you don't agree.

Local Happenings

District Attorney W. E. Wright and Sheriff George R. Carter spent Tuesday in Auburn attending the trial of Raymond Ferry on a burglary charge.

Mr. and Mrs. S. Lee Leiter have returned from Richardson Springs where they spent several days.

Miss Alice Noyes, who is taking a year's special art work in San Francisco, is spending a few days with her parents Mr. and Mrs. George M. Noyes of Gold Flat.

Mrs. F. F. Breese left for the bay region where she will spend some time visiting with relatives.

Miss Ernestine Eilerman left for Sierra county points on a visit.

M .W. Ayers, editor and publisher of The Mountain Messenger, was a business visitor in this city, Saturday.

Ross F. Taylor of Downieville was a business visitor in this city Saturday.

Walter Bond has returned from Burlingame where he spent some time with relatives.

Supervisors Alex Robertson of Hobart, Joe Frank of Rough and Ready and E. B. Dudley of North Bloomfield are here for the regular monthly session of the board.

Joe Korn, papersalesman for the Zellerbach Paper Company was a visitor in this city Tuesday.

Hartley Clark, who is stationed at the Bloomfield Ranger Station of the Forest Service, was a business visitor in this city.

Omar Tompkins has arrived from Marysville on a visit to his father, Oren A. Tompkins.

Frank Cummings from North Bloomfield was a visitor in this city recently.

CHEROKEE ITEMS

CHEROKEE, Mar. 6,—Mrs. Roy McNamara of Cherokee, who has been quite serfously ill for the past week, was agle to be taken to her home Friday. Mrs. McNamara was taken quite ill at her home in Cherokee and had to phone for the ambulance to come over for her. She was taken to the Jones Memorial Hospital at Grass Valley. She states that she received wonderful attention and care there. Her husband Mr. Roy McNamara, was with her on her return home, having come to Nevada City to see a doctor for relief for a very bad cold.

Mr. Morris P. Whisler of Cherokee was in town Friday and Mr. and Mrs. McNamara returned to their home in Cherokee with him.

Mrs. I. Musfield and son, Homer, were business visitors in Nevada City Friday.

The many friends of Mrs. Mary E Salmon, now a resident of Manteka formerly a resident of this city, will be glad to hear that she is getting along nicely, from an automobile accident she suffered a few weeks ago.

Mr. H. Gibson of Montezuma Hill was a business visitor in this city Friday.

Joe Swazey of Cherokee was a visitor in Nevada City during the week.

It looks like we are going to have an early spring. Plants are all coming out in leaf, potatoes starting to grow, boys playing baseball; all signs of spring.

Mr. and Mrs.. F. Phelanof Grass Valley visited relatives here Sunday.

Mr. W. Whisler and mother were business visitors in Nevada City Monday.

Mrs. R. McNamara returned home Friday from the Jones Memorial Hospital greatly improved.

Mr. and Mrs. L. Garbaldi returned to their home in Cherokee after a week's visit with there daughter Mrs. E. Pollard of Nevada City.

Mr. Gordon Kessler and father of San Juan were visiting here Monday

Our Mining men from Chico were here again.

James Phelan and wife of Nevada City were visiting relatives here Sunday.

Miss K. Brally visited friendsin Grass Valley and Nevada City Saturday and Sunday.

Mrs. Weeks, the school superior visited our school last Thursday..

Mr. and Mrs. J. Culver of French Sorral visited relatives in Cherokee Sunday.

Mr. and Mrs. H. Costa and Miss Mary Costa of Nevada City were visitors here Friday.

Mr. W. H. Hustler of Columbia Hill visited his wife at the Nevada Sanatarium Monday. We are all pleased to hear Mrs. Hustler will return home next week.

NEVADA LEGISLATURE PROPOSES BONUS

Proposing a state bounty for the discovery of gold mines in the state of Nevada, Assemblyman Branson has recently introduced a bill in the legislature, now in session, which he declares will stimulate prospecting if it is passed.

The measure proposes to pay discoverers of gold mines a bounty of $1000 if within six months after the discovery is made $10,000 worth of gold is taken from the property and an additional $1000 bounty for each additional $10,000 worth of ore until the state has paid $10,000.

For other properties in the same district it is proposed to pay bounty of ten per cent of the amount of ore taken out of the properties up to a total payment of $10,000 by the

Affidavits of the discovery must be made within ten days with the state mine inspection.—Mining Review.

If They Find Gold They Don't Need Bounty.

Assembly bill No. 54 by Branson of White Pine, makes provision up to $10,000 for bounties to be paid prospectors who discover gold either in new places or in places which have not produced within the past ten years.

Under the provisions of this interesting bill, the prospector, tobe eligible for a bounty payment, must discover gold in paying quantities.

Now it strikes that the prospector who finds gold in paying quantities doesn't need a bounty. The gold itself will be reward aplenty for him, just as the lure of gold is in itself enough to keep him prospecting as long as he can finance himself.

More to the point, we'd say, would be some method, if one could be devised, for financing worthy prospectors in their quest for treasure. Finances after discovery will take care of themselves.—Western Nevada Miner.

MOVIE PARTY AT GRASS VALLEY

Tuesday evening the seventh and eighth grades enjoyed a movie party at Grass Valley. The picture, an educational one, was entitled "Big Trail." A number of parents accompanied the children and kindly loaned their machines to transport other children. Mr. Dunlop took the balance of the children in his large truck.

MINERS OPPOSE KLAMATH TRINITY WATER BILL

The Miners Protective Association of Siskiyou county held a special meeting February 22 for the purpose of formulating plans to oppose Senate Bill 286 and Assembly Bill 502, which are pending before the legislature, declaring it to be a publis nuisance for any personfi firm or corporation to muddy or roil the waters of Klamath or Trinity rivers and their tributaries.

If this bill becomes a law it will kill the mining industry of the counties of Siskiyou and Trinity and will also deal a heavy blow to irrigation. The bills are sponsored by the Eureka Chamber of Commerce and many commercial sportsmen's organizations in Humboldt and Del Norte counties. The proponents of the bills are making an energetic campaign to bring about the passage of the bills

A meeting was held in San Francisco on February 11 before the conservation committee of the State Chamber of Commerce at which meeting Theodore Hover of Stanford University and Dr. Albert Taylor of the Klamath Study Committee were present.

E. J. Quinn of Eureka appeared at the San Francisco meeting as a representative of the advocates of the bill, and C. A. Paulson of Weaverville represented the opposition.

A spirited public meeting was held. J. B. Rohrer, chairman of the Siskiyou County Board of Supervisors, appeared at the meeting as a representative of Siskiyou county. It seems that Mr. Rohrer turned the tide against the bill when he told the committee he represented 25,000 resident taxpayers and business men of Siskiyou county and that they were unanimously against the bill. He was asked if he would still oppose the bill if it were amended to eliminate the irrigationists. He replied: "Oppose it? Of course we would oppose it. The agricultural and mining interests of our county are inseparably interlocked ,and we will oppose it just as strong in any form." The Conservation committee went on record against the bill.

The Sunday meeting here was attended by many prominent citizens of Trinity county who made the long trip to Yreka to join forces with the local organizations.

It is planned to have both counties send able representives to the legislature to help defeat the bills.

The following were presena at the meeting: Attorney J. A. Paulson, Miss Smith, extensive mine owner, and Henry Dannenbrink of Weaverville; George W. Milne of Fort Jones; E. J. Thomas, Okaland;S. W. Steffner Fort Jones; George Noonan, Scatt Bar; Orlo Steele, Senator James Allen, Attorney Geo. Tebbe, George Grotefen and H. J. Barton of Yreka; Henry Ream of Mt. Shasta, George W. Smith of Etna.
